Defining Our Brand

Personality

Putting it Together

Summary

# BUILT ON A SOLID FOUNDATION

## Do great places just happen?

Not a chance.

In 1955, when Denver Mayor Quigg Newton invited fellow elected officials from Adams, Arapahoe, Boulder and Jefferson counties to talk about joint issues and concerns, our region was in the midst of a post-World War II growth spurt. These leaders decided working together to enhance our region's quality of life was a much better approach than going it alone, and created the Denver Regional Council of Governments to foster collaboration and cooperation and to speak with one voice.

DRCOG endures today as one of the nation's three oldest councils of governments. Representatives of our region's counties, cities and towns work together to make life better for people of all ages, incomes and abilities. They are guided by the Metro Vision regional growth and development plan, which defines goals and actions needed to ensure the region remains a great place to live, work and play.

And while our history is an important aspect of our identity, we're also an organization that is constantly striving to improve. Recognized by our peer organizations around the country as innovative, progressive and effective, DRCOG continues to evolve in meaningful ways. In 2015 our Board adopted the mission and vision statements, providing the impetus for creation of a refreshed DRCOG brand identity.

## Mission and Vision – A Foundation for a Brand

The brand was built on the best possible foundation, our mission and vision statements.

**Mission:** The Denver Regional Council of Governments is a planning organization where local governments collaborate to establish guidelines, set policy and allocate funding in the areas of:

- transportation and personal mobility
- growth and development
- aging and disability resources

**Vision:** Our region is a diverse network of vibrant, connected, lifelong communities with a broad spectrum of housing, transportation and employment, complemented by world-class natural and built environments.

# Defining Our Brand IDENTITY

DRCOG has evolved in many ways during the past 60 years, and now represents nine counties and more than half the state’s population. The logo has evolved as well.

With the adoption of the mission and vision statements in 2015, the DRCOG team set out to develop a visual identity that is meaningful, relevant and reflects the attributes that make the organization stellar. So what are the absolute essentials that define DRCOG?

It all begins with collaboration. Leaders from throughout our region come together to make life better here. And while we speak with one voice on regional issues, we also celebrate the unique character of each community – our diversity makes us strong and vibrant.

Our three key areas of focus are also essential. We establish guidelines, set policy and allocate funding in the areas of **transportation and personal mobility, growth and development, and aging and disability resources.**

Colorado is, of course, a big part of our identity too. We represent more than half of the state’s population. We live our lives in and around the iconic Rocky Mountains, enjoying the amenities of our world-class urban areas, as well as the open space and expansive nature transitioning to the plains. It’s the best of many worlds and our brand reflects that.

# Yep, We've Got PERSONALITY

Our history represents a remarkable legacy. We've had a hand in such notable projects as Interstate 70 and Interstate 25, Denver International Airport and the Colorado Convention Center, and even the formation of the Regional Transportation District. We're solid, enduring and trustworthy, and excellent stewards of financial resources. At the same time, we're widely recognized as innovative, bold and effective – a leader among our peer organizations nationwide.

Ultimately you can't describe this organization without highlighting our purpose. We're working every day to make life better for the people of this region. Whatever you want to call it – caring, compassionate or responsible – a generous western spirit fuels much of what we do at DRCOG.

SYMBOLIZING THE COLORADO  
ROCKY MOUNTAINS

COLLABORATION: THREE AREAS OF  
FOCUS WORKING TOGETHER

# Putting It All Together A STRONG BRAND

It's challenging to refine DRCOG's long history and multifaceted identity into a cohesive, yet simple, visual identity. Our logo incorporates both a graphic element (mark or icon) as well as a wordmark.

Our logo reflects the central defining attribute of DRCOG – collaboration. The mark (icon) is made up of three pieces joined to form a triangle. It symbolizes the diverse communities that make up the region, coming together to form a solid, stable unit. In geometry, the triangle is regarded as the most stable, solid and safe shape.

Each of the sections of the triangle may also be identified with one of our three key focus areas:

- **transportation and mobility** – represented by the blue section
- **growth and development** – represented by the green section
- **older adults and people with disabilities** – represented by the orange section – not coincidentally, this section uses the logo's only warm color.

Our mark has a third important association. Whether we live on the plains, in the foothills or in an urban center, the mountains define our landscape. Our logo's triangle is evocative of the mountainous horizon to our West, an abstract representation of an iconic geographic feature.

The typeface suggests a friendly and approachable nature, evoking our people-oriented purpose. At the same time it has weight, communicating a solid, enduring and trustworthy foundation. Coupled with the color scheme it represents growth, prosperity, trustworthiness and innovation.

Reflecting the sizable percentage of Colorado's population that resides in our region, we evoke state pride by using green for the "co" in DRCOG.

## SUMMARY

The Denver Regional Council of Governments logo reflects its history, member governments and areas of focus. The logo is just a part of our visual identity which helps define the DRCOG brand.

The following brand guidelines define how and when you'll use the DRCOG logo. If you have questions, don't hesitate to contact Communications and Marketing.

# BRAND IDENTITY ELEMENTS

The DRCOG logo consists of three elements that should always appear together: the triangular icon, or mark, the acronym and the logotype. The configuration shown here is the preferred configuration. However, it is acceptable to use an alternative configuration at the discretion, or with the approval, of the senior graphic designer.

# DEFINING OUR MAP STYLES

## Mission and Vision — A Foundation for Good Cartography

Maps are an essential part of DRCOG’s mission to establish guidelines, set policy and allocate funding in the areas of:

- transportation and personal mobility
- growth and development
- aging and disability resources

Maps are often created by staff and viewed or distributed externally in order to share the results of our work, illustrate our data, engage the public and stakeholders in our process, and provide public information to the community in a legible way.

It is the policy of DRCOG to maintain mapping standards that do the following:

- adhere to recognized best practices and guidelines
- adhere to branding standards established by the DRCOG Communications and Marketing division
- provide necessary information for viewers to understand and interpret
- maintain visual consistency

**“Amateur looking maps...can undermine your audience’s ability to understand important information and weaken the presentation of a professional data investigation.”**

**— Cynthia Brewer,  
*Designing Better Maps***

# SUMMARY

## Procedure and Summary

The following section provides detailed information about DRCOG's map standards including individual map elements, audience considerations and style choices, map layout templates and tips for map sharing and final product review. This section should be considered a living document, and will be updated as necessary.

Ideally, this section will help to prevent inconsistency among DRCOG map products and will allow staff to produce, scale and iterate maps more easily. It will also result in better collaboration and act as a single source of truth among members of the information systems team, CAM Creative, other staff (such as planners and transportation modelers), external partners and consultants.

## External Partners and Consultants

Consultants should adhere to the standards outlined in this document to the best of their ability. Templates and recommendations included in this document can be adjusted based on the graphic requirements of specific plans and projects. DRCOG GIS staff can provide a "Map Package" (a zip file containing this document, templates, related base data, styles, and reference information) to consultants for any project.

## Exclusions

While the following document addresses cartographic map standards for representing and visualizing data, it does not address standards for geospatial data itself. Additionally, this document does not apply to internal working maps.

Exceptions to the information included in this document may include data briefs or planning publications that have their own custom graphic design standards.

Additionally, the standards outlined in this document for digital maps (for example, web maps) are limited and evolving.

# SUMMARY

## Brand and Style

Maps shall be designed adhering to the brand and style standards developed by CAM Creative and outlined in this document. Elements in the map that fall under this design include the DRCOG logo, typefaces and color palette choices. Quantitative or graduated color choices include the colors found on pages 11-13. Additional color palettes for maps include diverging and qualitative colors as detailed on the following pages.

## Color Palette

# MAP COLORS DIVERGING

<b>OPTION 1</b>	<b>RGB:</b> 75, 75, 75 <b>Hex:</b> #4B4B4B	<b>RGB:</b> 150, 150, 150 <b>Hex:</b> #969696	<b>RGB:</b> 225, 225, 225 <b>Hex:</b> #E1E1E1	<b>RGB:</b> 155, 218, 243 <b>Hex:</b> #9BDAF3	<b>RGB:</b> 5, 164, 225 <b>Hex:</b> #05A4E1

# ELEMENTS OF A MAP

## Logo

The DRCOG logo should always be included in DRCOG maps. The logo consists of three elements that should always appear together: the triangular icon, or mark, the acronym and the logotype. The DRCOG logo must be colored, sized and scaled appropriately according to brand standards. Division level or special logos can be used or added with final approval from the DRCOG GIS team.

## Title and Subtitle

The map title should be written in Arial Narrow Bold font. An optional map subtitle should be written in Arial Narrow font. The title and subtitle should use AP style guidelines, be sized legibly using the map templates as a guide, and broken into two lines if lengthy. The color should be black if using the logo and white title bar.

## North Arrow

All maps should contain a north arrow. The standard DRCOG north arrow is preferred, with Esri North Arrow Style 4 recommended as a backup. The north arrow should be placed alongside or near the scale bar.

## Scale Bar

All maps, including inset maps, should contain a scale bar. The font used should be Arial, with Esri Alternating Scale Bar 1 (Simple) as the style. Use two divisions and no subdivisions, with numbers located at divisions above the bar. Units should be represented in miles, in divisions of 1, 2, 5 or 10 miles. The label should be placed below or beside the bar.

# ELEMENTS OF A MAP

## Legend

All polygons, lines or points displayed on map should be represented in the legend. There should be no legend title. Layer names should be easy to read and underscores or other text separators should be removed. The legend should use Arial font and be clear, concise and minimally sized using the templates as a guide.

## Map Information and Source Notes

The DRCOG disclaimer, as updated in 2019, is required on or below all maps:

*“DRCOG makes no claims, representations or warranties, express or implied, concerning the validity (express or implied), the reliability or the accuracy of the data herein, including the implied validity of any uses of such data. DRCOG shall have no liability for the data or lack thereof, or any decisions made or action not taken in reliance upon any of the data.”*

When a map or multiple maps are embedded in a multipage document or presentation, the disclaimer can be placed as supplementary information at the end of the document.

In addition, all maps should include: data sources, name of map creator, creation date, location of contributing files, and projection. For these elements, use minimum font sizes indicated in the templates.

## Map Frame (Optional)

An optional 0.5 pt black map frame may surround the main map and any inset maps.

## Neat Lines (Optional)

A 0.5 pt black neat line can optionally be used throughout the layout. Use the map templates as a guide.

# ELEMENTS OF A MAP

## **Inset Maps (Optional)**

Inset maps should be used to provide context when the primary map is zoomed into a small portion of the region. They should also be used to provide context within the state of Colorado when the primary map shows areas beyond the DRCOG region.

## **Explanatory Text (Optional)**

Information about the map can optionally be included using a right-justified text block near the legend. Arial font should be used at a legible size, using the templates as a guide.

## **Supplementary Materials (Optional)**

Supplementary materials, such as graphs or photographs, can be included in a map layout. Use the partial page map templates as a guide and be sure that these graphics include a neatline when appropriate. Colors should follow a scheme similar to that of your map content.

## **Digital Extras (Optional)**

Drop-down menus, tooltips and warnings or disclaimers should have a cohesive, simple style and adhere to DRCOG graphic standards.

# MAP STYLE CHOICES

## Complexity of Data, Orientation and Size

Map size, layout and format should be carefully selected based on use. A wide variety of template options are available.

## Projection, Datum and Units

A projection is a method of displaying geospatial data from the curved surface of the Earth on a flat map surface. There are hundreds of projections, and all produce some kind of distortion — either to measured distances, areas, shapes, directions or some combination. A datum refers to reference specifications, such as benchmarks, of a measurement system (Esri Glossary 2013).

The projection and datum appropriate for use in the DRCOG region have been selected by the GIS Team to provide an accurate and aesthetically pleasing depiction of our areas of interest, as well as one that aligns with those of our member governments.

For the purposes of mapping the DRCOG region and surrounding areas, maps must use the following projection:

NAD\_1983\_2011\_StatePlane\_Colorado\_Central\_FIPS\_0502\_Ft\_US (EPSG 6428)

In this description, “ft” refers to the units of measurement. Please note the DRCOG GIS Team can assist with projection questions and issues.

## Preferred Base Maps

A base map is a map depicting background reference information such as landforms, roads, landmarks and political boundaries, onto which other thematic information is placed. A base map is used for reference. Note that in the Denver region, the mountains provide a sense of place and should be included on all base maps when possible.

DRCOG creates and publishes a variety of maps that have different base map needs. For example, the transportation team may need to highlight street names at a single crash intersection, while the planning team may not need street names displayed on a similarly scaled open space map.

# MAP STYLE CHOICES

Approved base maps include:

- Mapbox (Light, Dark, Outdoors, Satellite, Satellite Streets, Streets)
- DRAPP Imagery
- EsriTerrain
- National Geographic

Neutral base maps are useful when DRCOG data needs to be highlighted. DRCOG base data (for example, roads data) should also be used when additional context is needed.

## Line Weights, Opacity and Representations

All data should be represented using legible line weights. Layer opacity should be adjusted to allow the map user to view the base map underneath.

## Labels

Map labels should use Arial font at a size of at least 8 points. There should be no overlapping labels on a map, and all labels should be legibly oriented (no upside-down labels).

Preferred placements of a labels for specific geometries are:

- point: top right corner of point
- line: above the line
- polygon: centered (as much as possible)

Highway shields, municipality names, municipality points and county names can all be added as annotation or added to an Adobe Illustrator map using the templates.

Note that some projects (for example, Metro Vision) have specially designated color palettes. CAM Creative can be consulted for more information in these cases.

Many colors are difficult to distinguish or see when projected. For PowerPoint maps, please avoid light grays and yellows.

Many resources are available to help with color choices.

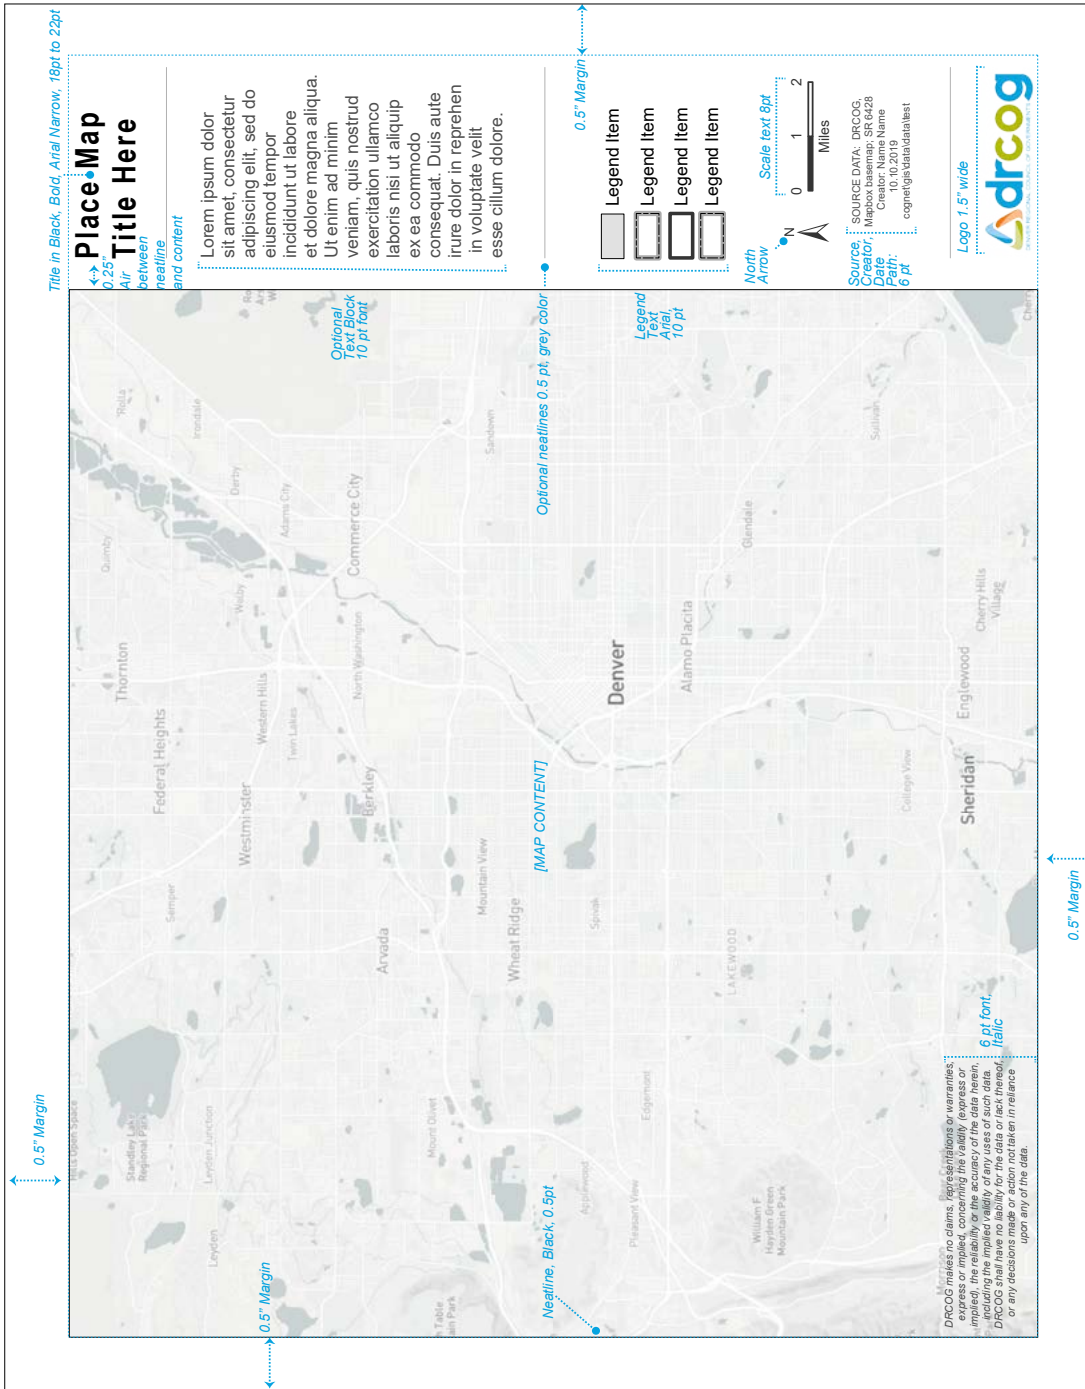

Color Picker: converts colors to and from RGB and HEX, aids in selecting color schemes: [colorpicker.com](http://colorpicker.com).

Color Brewer: Assists in selecting colors for the number of data classes in the map. Also shows schemes that are colorblind safe or print friendly. Aids in selecting complementary, diverging or qualitative colors: [colorbrewer2.org](http://colorbrewer2.org).

## Interactive Digital Map (As Standalone Webpage)

Location: Operations\GIS\_Standards\Maps\StandaloneWebMap\Experience\_Builder\_Template.PNG

Location of Code: ArcGIS Experience Builder

Notes: This template map uses the ArcGIS Experience Builder framework through ArcGIS Online. Esri Light Gray Terrain is the preferred basemap for interactive digital maps. Width and height are adjustable based on needs and purpose.

# MAP LAYOUT TEMPLATES

## PowerPoint Map

Location: \Operations\GIS\_Standards\Maps\PowerPoint\powerpoint\_map\_template.png

Notes: This is a simplified template map for use in PowerPoint presentation slides.

# MAP LAYOUT TEMPLATES

## Static Digital Map for Presentation or Web

If using a static map graphic as a digital image, use the partial page templates with special care that the colors are appropriate for screen and projectors and that all exported text is legible. Maps for web should be made interactive whenever possible. The DRCOG GIS team should be consulted for these situations.

# PUBLISHING, SHARING AND REVIEW

## Maps used for internal projects or workshops do not need to be reviewed by the GIS Team or CAM Creative.

Any maps used in publicly distributed reports, plans, websites and presentations, should have their working file locations documented and be reviewed by the GIS Team. The GIS Team will send any necessary information to CAM Creative for review depending on circumstances such as size of audience and how much the maps vary from template drafts. For printed documents, allowable map sizes include quarter page, half page and full page.

### Checklist for finalizing DRCOG maps

- ✓ title (if standalone map) [[see page 48](#)]
- ✓ logo (if standalone map) [[see page 41](#)]
- ✓ scale [[see page 48](#)]
- ✓ north arrow [[see page 48](#)]
- ✓ neat line [[see page 49](#)]
- ✓ legend [[see page 49](#)]
- ✓ data sources [[see page 49](#)]
- ✓ disclaimer [[see page 49](#)]
- ✓ initials of creator/date/location (if standalone map) [[see page 49](#)]
- ✓ appropriate font sizes [see template guide for your map size]
- ✓ appropriate colors [[see pages 44-47](#)]
- ✓ GIS Team review
