

Board of Directors

Meeting date: May 20, 2026

Agenda Item #: 16

Greenhouse Gas Mitigation Action Plan 2026 Report

Agenda item type: Informational item

Summary

The annual report developed to comply with the State Greenhouse Gas Transportation Planning Standard.

Background

The 2026 Greenhouse Gas Mitigation Action Plan Report is the fourth annual report required by the Transportation Commission's Greenhouse Gas Transportation Planning Standard. This report is required to address the implementation of DRCOG's Mitigation Action Plan prepared as part of its updated 2050 Metro Vision Regional Transportation Plan amended by the DRCOG Board in May 2024.

This 2026 Report shares local government coordination activities and local government actions relating to the mitigation measures. The Mitigation Action Plan details the region's approach to using mitigation measures to help achieve the greenhouse gas reduction levels required for the DRCOG metropolitan planning organization area for 2030, 2040, and 2050. DRCOG's mitigation measures are regional, policy-based, and represent the sum of potential local government voluntary actions related to:

- Increasing residential and employment densities.
- Mixed-use transit-oriented development.
- Reducing or eliminating minimum parking requirements while also setting maximum levels.
- Adopting local complete streets standards.

DRCOG staff are currently in the process of updating the 2050 Regional Transportation Plan and assessing the 2050 RTP's framework for GHG rule compliance, including updating and reassessing the Mitigation Action Plan.

Action by others

None.

Previous discussion/action

None.

Recommendation

None.
