

Regional Building Decarbonization Oversight Committee

Meeting date: March 14, 2025

Agenda Item #: 5 (Attachment C)

Program Guidance and Strategy

Agenda item type: Discussion

Summary

This item will focus on gathering strategic input to guide key program areas. DRCOG staff is seeking committee feedback on our communications, workforce development, and incentives strategies to ensure effective program implementation.

Background

This session will focus on gathering strategic input to guide key program areas based on program overviews that have been provided to the committee. The committee is asked for feedback on how to effectively engage and support community-based organizations in the grant process, ensure workforce development programs are accessible, and coordinate incentives and energy advising across the region. Additionally, we hope to discuss strategies for reaching households and businesses that stand to benefit most from these initiatives.

Staff will incorporate committee input into program planning and report back on implementation progress.
