## Beyond Limits: City of Boulder's Context-Sensitive Approach to Speed Limit Setting

## DRCOG Regional Vision Zero Meeting October 14, 2025

Devin Joslin, PE, PTOE, City of Boulder

#### OUTLINE

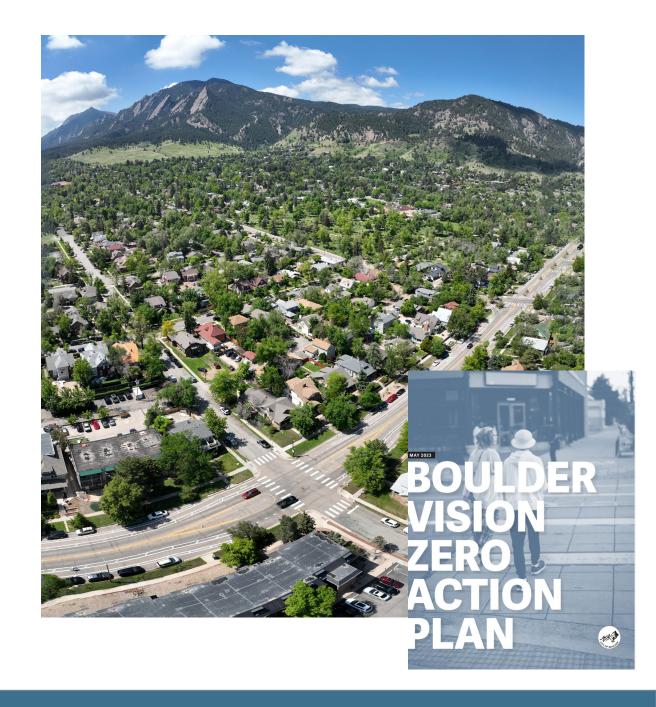

- I. Background & Purpose
- II. Methodology Development
- III. Methodology Application Examples
- IV. Results
- V. Project Successes

### I. Background & Purpose

### Background

- 20 is Plenty in 2020
- 1 out of 3 severe crashes involve speeding
- Inconsistent speed limits on collectors and arterials
- Context sensitive methodologies
- Funded by DRCOG CMPI grant
- Key stakeholders

### **Project Purpose**

**CONSISTENCY:** Develop methodology for speed limits aligned with street character

**DATA DRIVEN:** Establish quantitative process using crash history, roadway geometry, user experience, and land-use data

**SAFETY CENTRIC:** Prioritize speed-related and vulnerable user crashes in methodology

BICYCLE AND PEDESTRIAN ACTIVITY FOCUSED: Incorporate bicycle and pedestrian activity levels to determine posted speed limit.

Safe System Approach

> Safe Speeds

> > Roadway Design
> > Enforcement
> > Speed Limits
> > Education

### II. Methodology Development

Review of Best Practices & Peer Agencies

19 Factors Considered

16 Factors Selected

240 locations Collected Quantify the Need for Lower Speed Based on Segment Specific Data Compare
Speed Limit
Range and
Output
Tables

Establish Implementation Plan

- USLIMITS 2
- NCHRP
- CDOT Lookup Tables
- Six peer cities
- 240 locations Collected

- Stakeholder guided factors
- Workshop
   with City
   Staff on
   availability
   and quality of
   data
- Three tiers of factors based on priority

- Point System based on priority of factors
- Prioritized speed-related crashes and vulnerable user data
- Considers functional classification and land-use

 Based on Boulder's capacity and programs

#### What has been included

**Streets within city limits** 

**Streets owned by City of Boulder** 

Collector, minor arterial and principal arterial (no local streets)

Segmented by existing posted speed and functional classification

**Average 0.5-mile segments** 

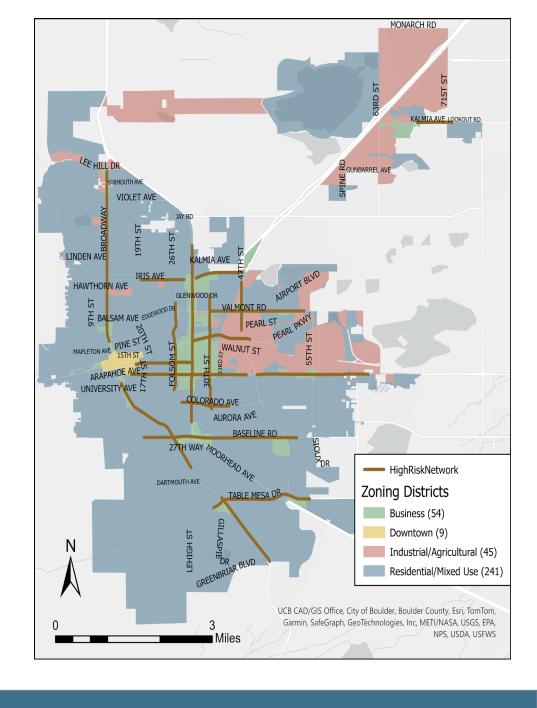

### **Attributes Considered – Land Use**

- Residential/Mixed-Use/Public (includes CU Campuses)
- Downtown
- Business
- Industrial/Agricultural
- Other (e.g. County)

	Downtown	Residential/ Mixed Use/ Public	Business	Industrial/ Agricultural
Collector	0.1 miles	24.6 miles	0.6 miles	5.1 miles
Minor Arterial	1.7 miles	14.2 miles	1.5 miles	5.5 miles
Principal Arterial	0.4 miles	6.0 miles	1.6 miles	4.5 miles
TOTAL	1.84 miles	44.8 miles	3.7 miles	15.1 miles

Zoning in each segment is assigned by the most predominant corresponding land use category

Attributes Considered – Roadway Context

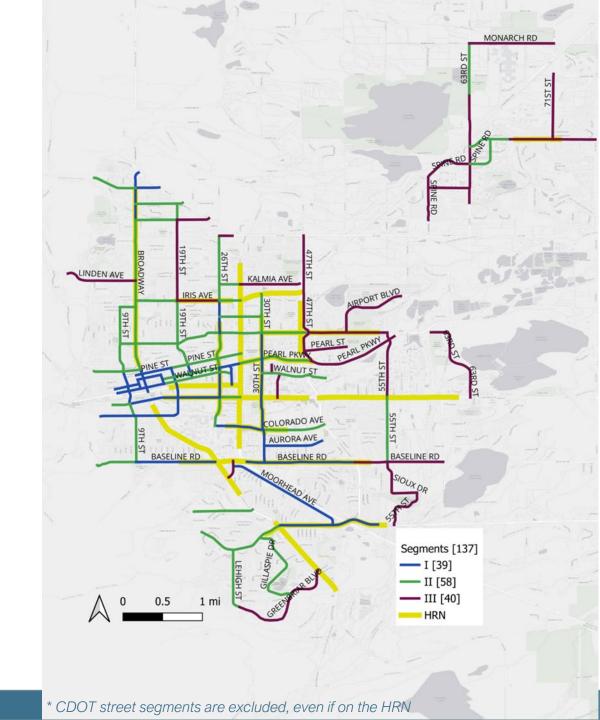

Factor	Category	Maximum points
Fatal crashes		15
Ped/Bike crashes	Crash	10
Speed crashes		10
Perpendicular multimodal crossings		5
Pedestrian facilities	Multimodal	5
Pedestrian activity	Multimodal	10
Bike facilities		5
Bike activity		10
Driveway access density		5
On street parking		5
Unsignalized density	Road Config	5
Signalized intersection density		5
Number of through lanes		4
Schools		2
Park	Trip generators	2
Assisted living facility		2
Total F	100	

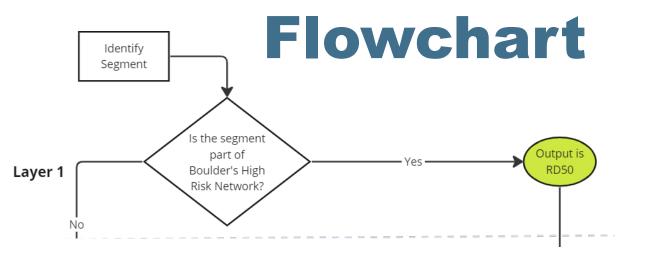

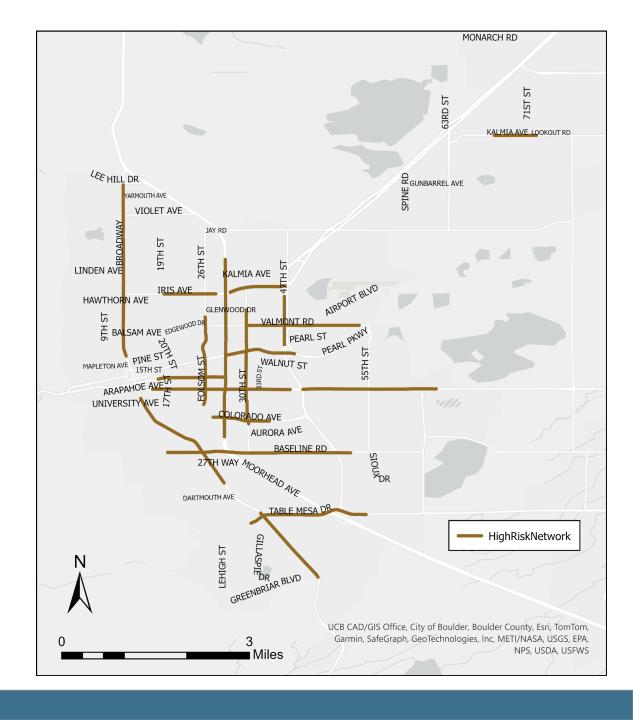

16 Boulder-Specific Factors & Thresholds

### Need for Lower Speeds

Tier I (55 – 100 points) – Highest need for low speeds Tier II (34 – 54 points) – Medium need for low speeds Tier III (0 – 33 points) – Lowest need for low speeds

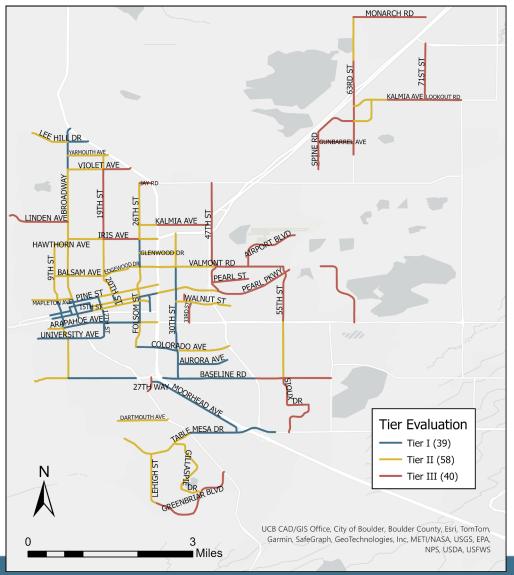

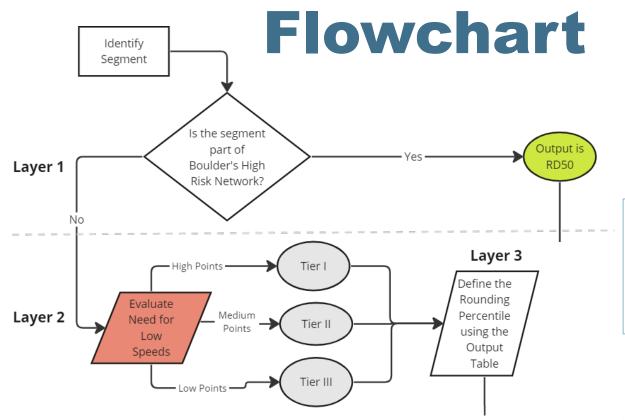

#### **Flowchart** Identify Segment Is the segment part of Boulder's High Layer 1 RD50 Risk Network? Tier I Evaluate Medium Layer 2 Need for Tier II Low Speeds Tier III

Tier I (55 - 100 points) – Highest need for low speeds Tier II (34 - 54 points) – Medium need for low speeds Tier III (0 - 33 points) – Lowest need for low speeds

### Output Table defines a rounding percentile to inform a recommended speed limit

	Land Use								
Residen	Residential/ Mixed Used Business/ Downtown			d Business/ Downtown Industrial/ Agricultural

C50	RD50	RD50	C50	C50	RD50	RD85	RD85	C50	
C50	C50	RD50	RD85	C50	C50	C85	RD85	RD85	
RD85	C50	C50	C85	RD85	RD85	C85	C85	RD85	
	Tier III C50 C50	Tier III         Tier II           C50         RD50           C50         C50	Tier III         Tier II         Tier I           C50         RD50         RD50           C50         C50         RD50	Residential/ Mixed Used         Busing           Tier III         Tier II         Tier II         Tier III           C50         RD50         RD50         C50           C50         C50         RD50         RD85	Residential/ Mixed Used         Business/ Dow           Tier II         Tier I         Tier II         Tier III         Tier II           C50         RD50         RD50         C50         C50           C50         C50         RD50         RD85         C50	Residential/ Mixed Used         Business/ Downtown           Tier III         Tier II         Ti	Residential/ Mixed Used         Business/ Downtown         Industr           Tier III         Tier I         Tier III         Tier I	Residential/ Mixed Used         Business/ Downtown         Industrial/ Agri           Tier III         Tier II         Tier III         Tier II         Tier II	

Tier I – Highest need for low speeds Tier II – Medium need for low speeds Tier III – Lowest need for low speeds

RD50 - rounded down 50<sup>th</sup> percentile

C50 - closest 50<sup>th</sup> percentile

RD85 - rounded down 85<sup>th</sup> percentile

C85 – closest 85<sup>th</sup> percentile

### **Output and Speed Limit Tables**

 Output Table defines a rounding percentile to inform a recommended speed limit

	Land Use								
	Residen	Residential/ Mixed Used Business/ Downtown			Jsed Business/ Downtown Industrial/ Agricultural				
Speed Category:	Tier III	Tier II	Tier I	Tier III	Tier II	Tier I	Tier III	Tier II	Tier I
Collector	C50	RD50	RD50	C50	C50	RD50	RD85	RD85	C50
Minor Arterial	C50	C50	RD50	RD85	C50	C50	C85	RD85	RD85
Principal Arterial	RD85	C50	C50	C85	RD85	RD85	C85	C85	RD85

Tier I – Highest need for low speeds

Tier II – Medium need for low speeds

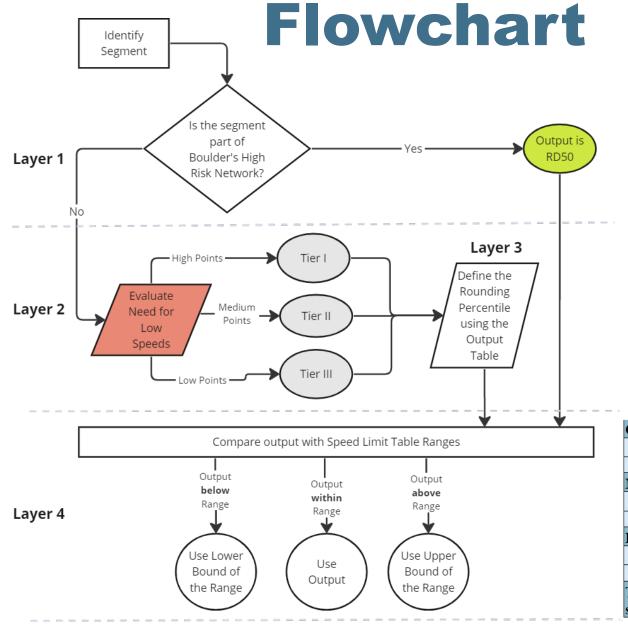

Tier III – Lowest need for low speeds

RD50 - rounded down 50th percentile

C50 - closest 50<sup>th</sup> percentile

RD85 - rounded down 85<sup>th</sup> percentile

C85 – closest 85<sup>th</sup> percentile

**Speed Limit Table** defines a range with lower and upper bounds that sets the limits of recommended speed

		Land Use	
	Downtown	Residential/ Mixed Use/ Business/ Public	Industrial/ Agricultural
Collector			
Speed Limit Range	20-25 mph	20-30 mph	25-35 mph
Miles/% of streets evaluated	[0.1 mi.; 0.2%]	[25.2; 38.1%]	[5.1 mi.; 7.7%]
Minor Arterial			
Speed Limit Range	20-25 mph	20-35 mph	30-40 mph
Miles/% of streets evaluated	[1.7 mi.; 2.6%]	[15.7 mi.; 23.8%]	[5.5 mi.; 8.3%]
Principal Arterial			
Speed Limit Range	20-25 mph	25-35 mph	30-45 mph
Miles/% of streets evaluated	[0.4 mi.; 0.6%]	[7.6 mi.; 11.5%]	[4.5 mi.; 6.8%]
Total Miles/% of streets evaluated	2.2 mi.; 3.4%	48.5 mi.; 73.4%	15.1 mi.; 22.8%

### **Output and Speed Limit Tables**

 Speed Limit Table defines a range with lower and upper bounds that sets the limits of recommended

speed

Pood		Land Use				
	Downtown	Residential/ Mixed Use/ Business/ Public	Industrial/ Agricultural			
Collector						
Speed Limit Range	20-25 mph	20-30 mph	25-35 mph			
Miles/% of streets evaluated	[0.1 mi.; 0.2%]	[25.2; 38.1%]	[5.1 mi.; 7.7%]			
Minor Arterial						
Speed Limit Range	20-25 mph	20-35 mph	30-40 mph			
Miles/% of streets evaluated	[1.7 mi.; 2.6%]	[15.7 mi.; 23.8%]	[5.5 mi.; 8.3%]			
Principal Arterial						
Speed Limit Range	20-25 mph	25-35 mph	30-45 mph			
Miles/% of streets evaluated	[0.4 mi.; 0.6%]	[7.6 mi.; 11.5%]	[4.5 mi.; 6.8%]			
Total Miles/% of streets evaluated	2.2 mi.; 3.4%	48.5 mi.; 73.4%	15.1 mi.; 22.8%			

Engineering evaluation ensures consistency in speed limits on corridors and by city boundaries.

### III. Methodology Application Examples

# Example 1 Residential/Mixed Use Minor Arterial

Example: Arapahoe Ave, 17th Street to Folsom St

Existing Speeds: 85th: 33 mph / 50th: 28 mph

Tier I

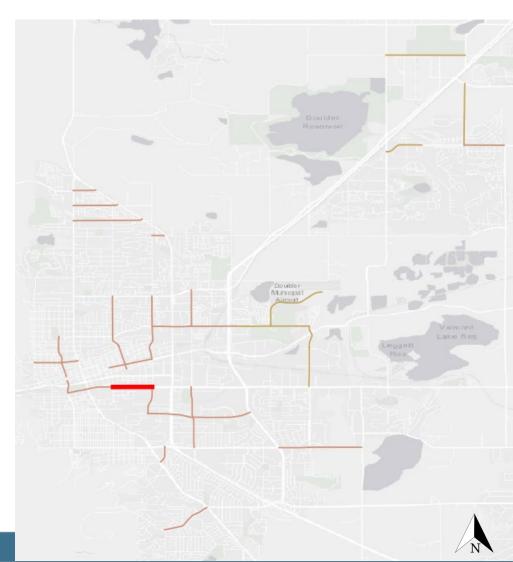

Arapahoe Ave @ 20th Looking east

Residential/ Mixed Use/ Business/ Public	EXISTING	PROPOSED
Collector (24.6 miles)	25-40	20-30
Minor Arterial (14.2 miles)	20-40	20-35
Principal Arterial (6.0 miles)	25-40	25-35

Speed

**SPEED** 

LIMIT

## **Example 1 High Risk Network**

Arapahoe Ave, 17th Street to Folsom St

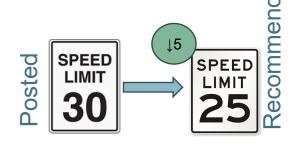

Existing Speed Limit: 30 mph

Collected 50th Percentile: 28, 29, 28

Average 50th Percentile: 28, RD=25

Range: 20-35 mph

Recommended Speed Limit: 25 mph

Speed Limit Table	Downtown	Residential/ Mixed Use/ Business/ Public	Industrial/ Agricultural	
Collector		20-30	25-35	
Minor Arterial	20-25	20-35	30-40	
Principal Arterial		25-35	30-45	

## **Example 2 Industrial Streets Minor Arterial**

Example: 55th, from Flatiron Pkwy to Arapahoe Ave

Existing Speeds: 85th: 43 mph / 50th: 38 mph

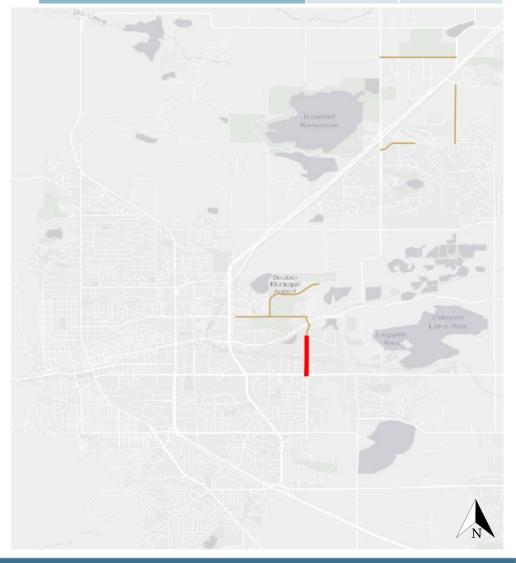

Tier III

Speed Limit Table

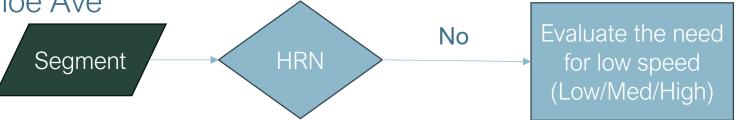

Industrial/ Agricultural Ranges	EXISTING	PROPOSED
Collector (5.1 miles)	25-35	25-35
Minor Arterial (5.5 miles)	30-40	30-40
Principal Arterial (4.5 miles)	35-45	30-45

## **Example 2 Industrial Minor Arterial**

55th, Flatiron Pkwy to Arapahoe Ave

## **Example 2 Industrial Minor Arterial**

55th, Flatiron Pkwy to Arapahoe Ave

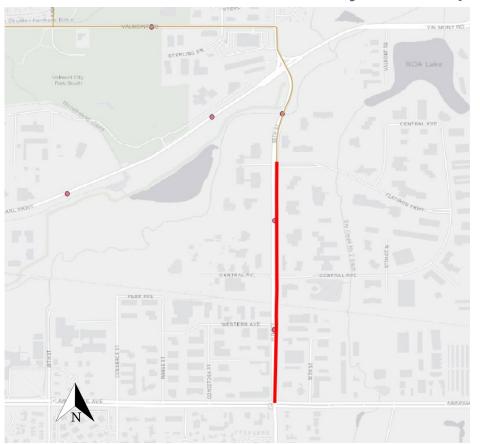

Factor	Segment Attribute
Fatal crashes	0
Ped/Bike crashes	8
Speed crashes	5
Perpendicular Multi-modal Crossings	4
Pedestrian facilities	Present
Pedestrian activity	Medium
Bike facilities	Present
Bike activity	Medium
Driveway Access Density	Low
On street parking	Not present
Unsignalized Density	Low
Signalized intersection density	High
Number of Through lanes	4
Schools	Not present
Park	Present
Community Senior Center	Not present

**TIER** 

## **Example 2 Industrial Minor Arterial**

55th, Flatiron Pkwy to Arapahoe Ave

Land Use:	Residential/ Mixed Used			Business/ Downtown				Industri Agricultu		
Speed:	TIER III	TIER II	TIER I	TIER III	TIER II	TIER I	TIER III	TIER II	TIER	<b>1</b> 1
Collector	C50	RD50	RD50	C50	C50	RD50	RD85	RD85	C50	)
Minor Arterial	C50	C50	RD50	RD85	C50	C50	C85	RD85	RD8	5
Principal Arterial	RD85	C50	C50	C85	RD85	RD85	C85	C85	RD8	5

Existing Speed Limit: 40 mph Collected 85th Percentile: 42/45 Closest 85th Percentile: 45 mph

Range: 30-40

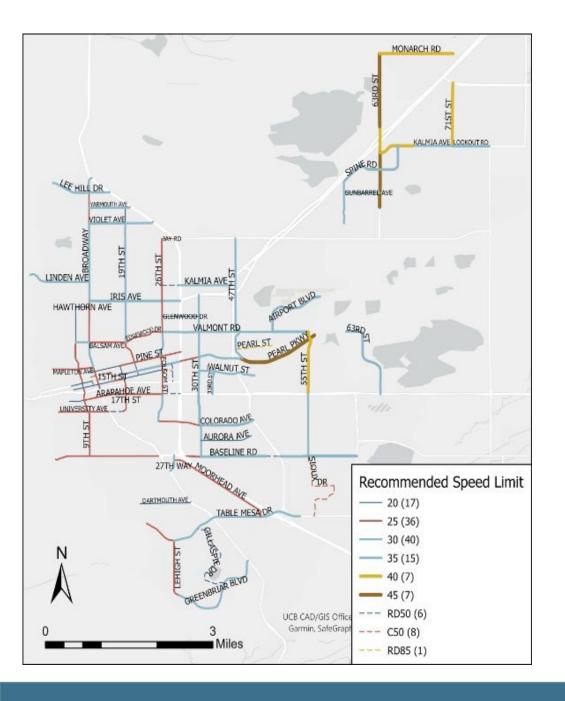

Recommended Speed Limit: 40 mph

Speed Limit Table	Downtown	Residential/ Mixed Use/ Business/ Public	Industrial/ Agricultural
Collector		20-30	25-35
Minor Arterial	20-25	20-35	30-40
Principal Arterial		25-35	30-45

### **IV. Results**

### Recommended Speeds

- Lower speeds near downtown; highest speeds in industrial/agricultural areas
- 73% of evaluated streets recommended for ≤ 30 mph
- 12% of evaluated streets recommended speed limit of ≥ 40 mph

	-10 mph	-5 mph	0 mph	+5 mph	+10 mph	Total
High Risk Network (HRN)	1.6	10.3	7.0	0.0	0	18.9
Not on HRN	1.5	8.8	24.6	6.6	0.8	42.4
Total	3.2	19.2	31.6	6.6	0.8	61.4

<sup>\*</sup> CDOT street segments are excluded

<sup>\*\*</sup> Engineering Judgement Layer Not Applied

## Final Recommendations

58% of streets remain unchanged

**86%** of the streets with changes are recommended to be reduced by 5 mph

0% of streets are recommended to be increased

- No HRN streets with recommended increases
- 61% of HRN streets are recommended to be reduced

LEE HILL DR AURORA AVE 27TH WAY MOORH Posted vs Recommended -10(8)--- N/A (15)

<sup>\*</sup> CDOT street segments are excluded

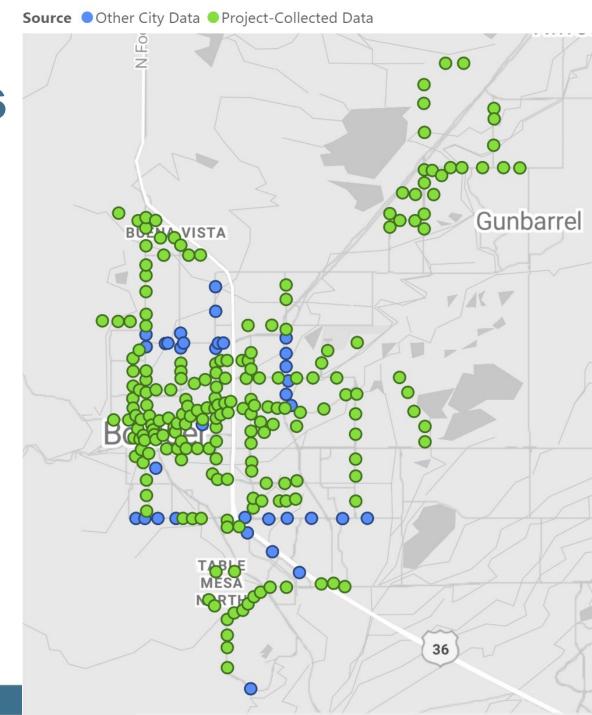

<sup>\*\*</sup> Engineering Judgement Layer Applied

### IV. Project Successes

### **Project Successes**

- Funded through a Community Mobility Planning and Implementation (CMPI) grant from DRCOG
- Completed first ever systematic, citywide evaluation of speed limits
- Completed largest ever citywide data collection effort
- Developed innovative methodology that incorporates roadway context and industry best practices

### **Key Takeaways**

- The methodology matches city goals for safer speeds and Vision Zero.
- 58% of the segments' recommendations matches the current speeds, validating the approach and showcasing what Boulder is already doing right
- Method suggests slower speeds where it counts, for safer streets where it matters most.
