

Overview of SB25-030 project inventory development process for identifying bicycle, pedestrian and transit projects at, or along, the DRCOG Regional Roadway System

Fall 2025

Overview

As required by [SB25-030](#), the Denver Regional Council of Governments (DRCOG) is compiling an inventory of planned bicycle, pedestrian and transit projects for local governments inside the DRCOG [metropolitan planning organization \(MPO\) area](#). For areas outside of the DRCOG MPO area, CDOT and other MPOs are required to collect inventory information. **Local governments with a population of 5,000 or more are required to [submit planned bicycle, pedestrian and transit projects](#) to DRCOG by December 31, 2025.**

DRCOG staff will utilize these project submissions to create an inventory of projects that are along, or adjacent to, the DRCOG Regional Roadway System. This information will be used to report to the Transportation Legislation Review Committee before October 31, 2026 as described in SB25-030.

Timeline

- **Mid-October 2025:** DRCOG staff will send a formal request to all local governments within the MPO area with information about the requirements established by SB25-030 and information about the process to submit projects to DRCOG.
- **October 27, 2025:** DRCOG staff will present to the [DRCOG Transportation Advisory Committee](#) on the process for developing and submitting the project inventory.
- **November and December 2025:** DRCOG staff will be available for discussions with local government staff.
- **By December 31, 2025:** Local governments with a population of 5,000 or more shall submit all planned bicycle, pedestrian and transit projects to DRCOG [using this form](#).

Expectations for local governments

Local governments with a population of 5,000 or more are required by SB25-030 to submit a list of planned bicycle, pedestrian and transit projects to DRCOG by December 31, 2025.

What types of planned projects should be submitted?

The state requires local governments in the MPO area with a population of 5,000 or more to submit a list of all planned bicycle, pedestrian and transit projects to DRCOG. A planned project is a proposed capital or service investment that is specified in a transportation, capital or other plan. Proposed projects can come from plans including, but not limited to: transportation plans, active transportation plans, transit plans, mobility sections of

comprehensive plans, capital improvement plans, annual budgets, safety studies, corridor plans and neighborhood plans.

These may be a variety of **project types** including, but not limited to:

- **Bicycle infrastructure:**
 - Bicycle lane;
 - Separated bicycle lane;
 - Neighborhood bikeway or bicycle boulevards;
 - Shared-use path;
 - Sidepath;
 - Crossing improvements; and
 - Signs and signals.
- **Pedestrian infrastructure:**
 - Sidewalk;
 - Shared street/pedestrianization;
 - Crossing improvements (such as curb ramps, pedestrian signals, pedestrian islands or mid-block crossings);
 - [Complete Streets](#);
 - Traffic calming or roadway reallocation;
 - Overpasses or underpasses;
 - Wayfinding; and
 - ADA compliance projects.
- **Transit (fixed-route or on-demand) service and facilities:**
 - New service;
 - Extended service routes or areas;
 - Service enhancements (such as increase frequency, hours);
 - Transit facility (such as stop, station or amenities); and
- **Active transportation or transit-supportive programs or services:**
 - Shared micromobility services.
 - First and last mile programming or improvements.

What type of information should be included for each planned project?

For each project please submit:

- Project name;
- Primary project type;
- Project location; and
- Plan(s) containing the project.

Additional information may be included in the inventory if available, including:

- Latitude and longitude, if applicable;
- Project length;
- Cost estimate;
- Year of cost estimate;
- Brief project description; and
- Additional comments.

How should the list of planned projects be submitted?

Local governments can submit their list of planned projects in a variety of file types or formats depending on what is available. Acceptable file types include, in order of preference:

- SHP (GIS shapefiles);
- XLS/X or CSV (Excel);
- DOC/X (Word);
- PDF.

All materials can be submitted digitally using [this form](#).

What projects should not be included?

This inventory is not intended to capture transit operations or maintenance of existing routes or services, active transportation education or encouragement programs, plans or studies, data collection or count programs.

What happens once I submit my local government's planned bicycle, pedestrian and transit projects?

Once a local government submits their project inventory, DRCOG will begin to build a regional inventory of planned bicycle, pedestrian and transit projects. DRCOG will identify those projects located along, or adjacent to (within a ¼ mile) the Regional Roadway System and report this information to the Transportation Legislation Review Committee.

Who should I contact if I have questions?

If you have questions, please reach out to Emily Lindsey at elindsey@drcog.org or Alvan-Bidal Sanchez at asanchez@drcog.org.
