

Award Totals Jurisdictional awards will be allocated through two grant rounds. The first round of funding will allocate \$34,200,000 as formula funds across all jurisdictions in the DRCOG area. Jurisdictions are scored and assigned to one of eight funding tiers, based on:

- 2025 Population (30%)
- 2025 Jobs (45%)
- Projected population growth 2025-2050 (10%)
- Projected job growth 2025-2050 (15%)

These scoring criteria are based on statistics and projections maintained by DRCOG. Population is used as a proxy for residential building stock, jobs as a correlate for commercial real estate. The relative weighing of population to jobs is based on DRCOG’s greenhouse gas inventory, where 22% of emissions come from residential buildings and 30% come from commercial (see [DRCOG Priority Climate Action Plan](#) Figure 4). Current population and jobs as of 2025 represents 75% of the total score; future projections from 2025-2050 represent the remaining 25% of the score.

The Score is calculated as:

$$\text{Score} = (30 \times \text{community's \% of total DRCOG population in 2025}) + (45 \times \text{community's \% of total DRCOG jobs in 2025}) + (10 \times \text{community's \% of total DRCOG projected population growth 2025-2050}) + (15 \times \text{community's \% of total DRCOG projected job growth 2025-2050})$$

Max awards are determined as:

Score	Max Award
≤ 14	\$50,000
15 to 24	\$100,000
25 to 49	\$300,000
50 to 124	\$600,000
125 to 249	\$900,000
250 to 349	\$1,200,000
350 to 449	\$1,500,000
450+	\$2,000,000
