

# AGENDA

## DRCOG REGIONAL TRANSPORTATION OPERATIONS WORKING GROUP

Wednesday, August 22, 2018  
1:30 PM to 3:30 PM  
Aspen Conference Room  
(West Side on Ground Floor)  
1001 17<sup>th</sup> Street, Denver, CO

1. Welcome/Introductions

2. Denver Center-to-Center Feasibility Study

One of Denver's RTO projects was the development of a center-to-center feasibility study. It began as a study to determine interconnection of foreign signal systems and expanded to be more comprehensive. Denver and their consultant will present the results of their effort.

3. CDOT Adaptive Traffic Signal Control Feasibility Study

One of CDOT's RTO projects was to evaluate roadways in the region to determine candidate locations to pilot adaptive signal control. Since introducing a separate control system will have an impact on neighboring operations, CDOT would like to present the results of this initial study for discussion.

4. CDOT Video Sharing Discussion

CDOT is looking ahead to options for camera system control and are very interested in reaching out to the stakeholders to coordinate on what will work best for both the state and the stakeholders. We have previously seen a presentation. This will be a follow on to carry on the discussion.

5. Project Updates/Other Items/Announcements

- Next regularly-scheduled RTO working group meeting date: **September 26, 2018**
