## AGENDA

**WORKING GROUP**  
**Tuesday, December 6, 2022**  
**2:30 p.m.**

### **Remote Meeting**

DRCOG is hosting this meeting remotely (no in-person option).

Please register and join the meeting using this link:

[https://us06web.zoom.us/meeting/register/tZcsceqqqTsoGtWevEuUA0wGX4\\_KjVD9TTgM](https://us06web.zoom.us/meeting/register/tZcsceqqqTsoGtWevEuUA0wGX4_KjVD9TTgM)

- 1. Welcome and Introductions**
- 2. AMP Focus Area: System Operations**  
*DRCOG Regional Transportation Operations and Technology Strategic Plan*  
Greg MacKinnon, Transportation Operations Program Manager, DRCOG
- 3. Informational Briefing**  
*Smart Work Zone Specification*  
Ben Acimovic, Traffic Operations and Technology Manager, CDOT  
  
*CDOT's Streetlight InSight Subscription*  
Nell Conti, GIS Section Manager, CDOT
- 4. Annual Tactical Action Updates**
- 5. 2023 Meeting Calendar**
- 6. Partner Agency Updates and Other Matters**
- 7. Next Meeting: February 7, 2023**

Attendees can request additional aids or services, such as interpretation or assistive listening devices, by calling 303-480-6701 or emailing [kfallon@drcog.org](mailto:kfallon@drcog.org). Please notify us at least 48 hours in advance so we can coordinate your request.

**WORKING GROUP**  
**Tuesday, November 1, 2022**  
**2:30 p.m.**

**Denver Regional Council of Governments**  
**held remotely via Zoom**

**MEETING SUMMARY**

**Attendees**

Shazal Afraaz, Felsburg Holt & Ullevig  
Anna Bunce, City of Centennial  
Scott Burton, City and County of Denver  
Kalie Fallon, DRCOG  
John Firouzi, City of Arvada  
Andy Geleske, CDOT  
Jason Green, Northern Colorado Clean Cities  
Brian Hamlin, Seattle DOT  
Kristin Kenyon, FTA  
Michael King, CDOT  
Emily Kleinfelter, DRCOG  
Anne Kuechenmeister, Michael Baker International  
Alex Larson, Olsson  
Diego Lopez, Northern Colorado Clean Cities  
Greg MacKinnon, DRCOG  
Wes Marshall, CU Denver  
Ryan McCann, City and County of Denver  
Dan Merritt, RTD

Aditi Misra, CU Denver  
Doug Monroe, RTD  
Eliot Mueeting, Populus  
Lisa Nguyen, DEN  
Ashley Nysten, CDOT  
Heather Pickering-Hilgers, CDOT  
Carson Priest, Smart Commute Metro  
North  
Flo Raitano, DRCOG  
Tegan Rice, RTD  
Jan Rowe, CDOT  
Josh Schwenk, DRCOG  
Josh Sperling, NREL  
Robert Spotts, DRCOG  
Lisa Streisfeld, CDOT  
Kellee Van Bruggen, City of Arvada  
Brian Welch, RTD  
Tom Worker-Braddock, City of Aurora  
Sina Zhen, CDOT

**1. Welcome and Introductions**

Ashley Nysten, CDOT, welcomed attendees to the Advanced Mobility Partnership (AMP) Working Group and introduced Heather Pickering-Hilgers, interim Chair.

**2. Informational Briefings**

*Seattle Department of Transportation, Curb Management Strategies*

Brian Hamlin, Seattle Department of Transportation, introduced the City of Seattle's curbside management strategies.<sup>1</sup> The current curbside management priorities are

<sup>1</sup> <https://www.seattle.gov/transportation/projects-and-programs/programs/parking-program/parking-regulations/flex-zone/curb-use-priorities-in-seattle>

**COLORADO**  
Department of Transportation

ADVANCED  
MOBILITY  
PARTNERSHIP

dictated by the city's Comprehensive Plan. The curbside management team sets strategic plans and policies to manage curb use and further the city's goals around sustainability, livability, and equity. The suite of strategies includes flex zone policies, a performance-based paid parking pricing program, a digital commercial vehicle permit program, restricted parking zones, and a curbside EV charging pilot program.

The curbside management team analyzes the current curb environment using data sets of sign records, curb inventory, and pay stations. The city currently has over 90,000 curb sign records in an asset management system and 2,700 block faces with digital linear curb inventory. There are 1,500 pay stations with an average of 10 million paid parking transactions annually. These data sets, in combination with an annual parking study, are used to inform and measure curbside policies and regulations. However, the sign record data stored in the asset management system is currently not machine readable and the city cannot communicate digitally with third parties regarding curbside space availability and regulations.

To find a solution, the city joined the Open Mobility Foundation (OMF) and participated in a steering committee to develop Curb Data Specification (CDS).<sup>2</sup> CDS standardizes how cities record and communicate curb data. There are three APIs in CDS: inventory, events, and metrics, which allow for standardizing data. The city is currently working with Populus to develop a translation strategy and standardize their sign record inventory data into CDS. The city continues to research the feasibility of other innovative curbside management programs and how CDS will inform those programs. Examples include e-cargo bike deliveries and green loading zones, automated commercial vehicle payments, and commercial vehicle permits

*Colorado Department of Transportation, Office of Innovative Mobility Grants*

Sina Zhen and Andy Geleske, CDOT, gave an overview of CDOT's Office of Innovative Mobility (OIM) available Innovative Mobility Grants.<sup>3</sup> The Office of Innovative Mobility's mission is to reduce air pollution caused by roadway congestion by expanding multimodal options. The purpose of the OIM Grants is to provide financial assistance to stakeholders looking to implement programs and projects that support OIM's core mission. The current call for projects includes funding opportunities for mobility services, mobility technology programs, and electrification and energy projects. Overall, the OIM grant is building on the success of the previous Strategic TDM Grants by including other programs and expanding resources.

There are two grant offerings under the Strategic TDM Grants: TDM Seed Funding and TDM Innovation Grants. As of the meeting date, there have been two previous rounds of funding for both TDM Seed Funding and the TDM Innovation Grants. The TDM Innovation

PARTNERSHIP

Grant offers \$20,000 - \$50,000 per project over one year with a 20% match requirement. The TDM Seed Funding Grant offers \$20,000 - \$100,000 per program over two years with a 20% match preference.

The Electrification and Energy Grant's purpose is to propel the state's electrification efforts and expand public awareness and adoption of electric vehicles. The grant offering has two funding categories: ZEV workforce development and e-mobility education and awareness. Applicants may be awarded \$20,000 - \$100,000 with a 20% match encouraged over a one-year period. The Mobility Technology Grant's purpose is to increase the safety and efficiency of Colorado's roadways as well as accelerate the adoption of connected vehicles. Applicants will not be awarded cash, but instead awarded a one-time in-kind donation of up to 10 Roadside Units and up to 10 Onboard Units. CDOT will provide additional project support for one year.

NOFOs are now open. Grant applications are due December 9, 2022. An informational webinar regarding OIM grants will be hosted on November 9, 2022 at 12pm. Questions can be sent to: [dot\\_innovativemobility@state.co.us](mailto:dot_innovativemobility@state.co.us).

#### *Regional Transportation District, Reimagine RTD*

Brain Welch, RTD, gave an update on the Reimagine RTD Mobility Plan for the Future.<sup>4</sup> The Mobility Plan for the Future was conducted to address recent industry advancements and societal shifts that have changed how and when people travel. It was created to understand how the region will change in the future and to better understand how RTD should adapt to future changes. The plan established a set of guiding principles, which include mobility, equity, finance, partnerships, workforce, and sustainability. Market, demand and financial analyses were done to better understand the future horizons, up to the year 2050. As a part of the plan, RTD assessed current challenges as well as future needs and opportunities. Future needs and opportunity areas include Maas, partnerships, workforce retention, zero emission vehicles, and facility upgrades.

The plan went through robust public and stakeholder input. There was a total of 181 meetings with over 4,000 attendees and over 1,600 comments received on the SOP.<sup>5</sup> There was a strong desire for RTD to add service overall and a strong support to prioritize those in need from public feedback. Additionally, there were concerns expressed about the reliability and safety of existing services. From this feedback, recommendations established four categories of the system optimization plan: access, equity, sustainability, and financial. Implementation of the plan will focus on these four categories.

### 3. 2023 Calendar

ADVANCED  
MOBILITY  
PARTNERSHIP

Kalie Fallon, DRCOG, went over the AMP Working Group calendar for 2023 and pointed out meetings will be cancelled due to holidays. Ms. Fallon asked if any members have ideas for topics or speakers they would like to see present at future 2023 meetings to let her know. Ms. Nyguen pointed out that a field trip to DEN would be of interest.

**4. Partner Agency Updates and Other Matters**

Kalie Fallon, DRCOG, gave an overview of DRCOG's novel regional crash data consortium and invited partner agencies to reach out to Erik Braaten, senior planner at DRCOG, for more information.

**5. Next Meeting and Adjournment**

Ms. Pickering-Hilgers thanked everyone for participating in the meeting. The next is December 6, 2022.

DRAFT

COLORADO  
Department of Transportation

ADVANCED  
MOBILITY  
PARTNERSHIP

**DATE:** December 6, 2022  
**TO:** AMP Working Group  
**FROM:** Greg MacKinnon, Transportation Operations Program Manager, DRCOG  
**SUBJECT:** AMP Focus Area: System Operations  
DRCOG Regional Transportation Operations and Technology Strategic Plan  
**ACTION:** Information

### SUMMARY

DRCOG, with key regional stakeholders, including CDOT and RTD, has completed the draft Regional Transportation Operations & Technology (RTO&T) Strategic Plan. This strategic plan was distributed to both the Regional Transportation Operations (RTO) and Advanced Mobility Partnership (AMP) Working Groups for comment. This plan is now scheduled to be presented to the DRCOG committees and Board for approval.

This strategic plan is aspirational, envisioning a region that provides safe, efficient, and seamless travel between jurisdictions and modes. The strategic plan will also significantly influence the DRCOG RTO&T Set-Aside call-for-projects which is scheduled to occur in Spring 2023. DRCOG is currently preparing a guide for all the set-aside programs identified in the current DRCOG TIP Policy. This guide will describe the call-for-projects and project selection process for each of the set-aside programs. DRCOG staff will solicit input from the AMP Working Group on elements of the RTO&T Set-Aside process.

**DATE:** December 6, 2022  
**TO:** AMP Working Group  
**FROM:** Kalie Fallon, Emerging Mobility and TDM Planner, DRCOG  
**SUBJECT:** Informational Briefings  
**ACTION:** Information

### SUMMARY

The AMP Working Group will have two informational briefings at the December meeting:

#### *Smart Work Zone Specifications*

Ben Acimovic, Traffic Operations and Technology Manager at CDOT, will present CDOT's Smart Work Zone specifications and deployments, which are based on the Smart Work Zones established in CDOT's Region 1 and Region 4.

#### *CDOT's Streetlight InSight Subscription*

Nell Conti, GIS Section Manager at CDOT, will provide a high-level overview of the data, metrics, and analytics included in the subscription as well as explain how potential users can gain access<sup>1</sup>.
