#### SUMMARY OF METRO VISION ISSUES COMMITTEE MEETING January 8, 2014

<u>MVIC Members Present</u>: Jackie Millet – Lone Tree; Eva Henry – Adams County; Nancy Sharpe – Arapahoe County; Bob Roth – Aurora; Sue Horn – Bennett; Elise Jones – Boulder County; Suzanne Jones – Boulder; Cathy Noon – Centennial; Tim Mauck – Clear Creek County; Jim Benson – Commerce City; Robin Kniech – Denver; Jack Hilbert – Douglas County; Marjorie Sloan – Golden; Don Rosier – Jefferson County; Phil Cernanec – Littleton; Val Vigil – Thornton.

Others present: Joe Fowler – Douglas County; Lizzie Kemp – CDOT/RTD; Ted Heyd – Bicycle Colorado; and DRCOG staff.

#### Call to Order

The meeting was called to order at 4:03 p.m.; a quorum was present.

#### **Public Comment**

Ted Heyd, Bicycle Colorado, thanked members for their ongoing efforts on updating the TIP policy. He noted he is keeping regional partners throughout the area updated on what is going on at DRCOG. He noted that according to the 2011 Travel Survey 20 percent of all regional trips are less than 1 mile. He encouraged facilitating high quality pedestrian and bicycle projects in the area.

#### Summary of November 6, 2013 Meeting

The summary was accepted as written. Members requested that materials provided by members of the public during public comment be distributed as part of the meeting summary.

Move to recommend to the DRCOG Board designation of TAC as the 2040 RTP technical lead to develop the evaluation criteria and process for determining regionally significant projects

Staff discussed designation of the Transportation Advisory Committee (TAC) as the lead to develop evaluation criteria for determining regionally significant projects for the 2040 RTP. Regionally significant projects must be included in the Regional Transportation Plan to be eligible for future federal funding. Locally-funded regionally significant projects are also included in the Plan for the purpose of air quality conformity modeling. Recommendations will be brought to the Board for action. Elise Jones asked how MPACT64 would be accommodated. Staff replied that a Plan A and Plan B would likely be developed and modeled, as was done when the FasTracks vote was pending.

Robin Kniech **moved**, **seconded** by Sue Horn, to recommend to the DRCOG Board designation of TAC as the 2040 RTP technical lead to develop the evaluation criteria and process for determining regionally significant projects. The motion **passed unanimously**.

Move to recommend to the DRCOG Board improvements to the Transportation Improvement Program (TIP) as agreed to during the meeting Staff was asked to provide additional information on two topics from the last meeting:

Metro Vision Issues Committee Summary January 8, 2014 Page 2

 Could the "roadway operational" and 'roadway reconstruction" project type categories be combined into one? Roadway operational projects improve traffic flow and reduce congestion delays; reconstruction projects rebuild an existing road in poor physical condition. Staff recommends retaining two separate categories, as each contains unique comparative characteristics.

Elise Jones **moved**, **seconded** by Nancy Sharpe, the staff recommendation to retain the two separate roadway categories. The motion **passed unanimously**.

2. Propose a funding effectiveness criteria. A revised criteria to provide an incentive for lower funding requests, in lieu of rewarding overmatch was presented. Staff recommends using the amount of funds requested as the basis for calculating an effectiveness ratio to incentivize sponsors to provide local matching funds over and above the required federal match.

Suzanne Jones **moved**, **seconded** by Bob Roth, the staff recommendation to use the amount of funds requested as the basis for calculating an effectiveness ratio to incentivize sponsors to provide local matching funds over and above the required federal match. The motion **passed unanimously**.

Two new items were introduced for discussion.

1. Confirmation of continuing the two-phase project selection process. Currently project selection is a two-stage process. In the first phase, funds are programmed to projects based solely on project score until 75 percent of the available funds for each project type are used up. In the second phase, MVIC recommends funding of projects based on other factors, such as funding equity, very small communities, etc. Projects of all types are discussed together and the remaining funds are allocated. Staff recommends retaining a two-phase selection process similar to that of past TIPs.

Sue Horn **moved**, **seconded** by Rocky Piro, to adopt a phased approach to project selection. The motion **passed unanimously**.

How the phasing will occur and percentages for phases will be discussed at a later date.

- 2. Metro Vision project scoring criteria. In the current TIP, 26 percent of the total points which may be awarded are based on how the project and project sponsor attend to the tenets of Metro Vision. These criteria are used for all project applications. Several questions were posed to members:
  - a. Is roughly one-quarter of the total points a reasonable share to reflect Metro Vision tenets?
  - b. Does MVIC agree/disagree with the recommended modifications noted in the attachments?
  - c. Are there other types of criteria that should be included/excluded?

Members discussed various aspects of the Metro Vision points. It was agreed to continue the discussion of Metro Vision points at the next meeting. Jennifer Schaufele noted that the Administrative Committee and Board of Directors meetings for January will be

Metro Vision Issues Committee Summary January 8, 2014 Page 3

cancelled due to a lack of urgent action items. Members were asked about possibly meeting during that time, since it is set-aside on member's calendars. Members agreed to meet again on Wednesday, January 15 at 6:30 p.m. It was further noted that the Organizational Development meeting originally scheduled for 3:30 p.m. on January 15 will move to 4:30. Dinner will be available for members of the Organizational Development group.

#### **Other Matters**

Jennifer Schaufele introduced Doug Rex, DRCOG's new Director of Transportation Planning & Operations.

#### **Next Meeting**

The next meeting is scheduled for January 15, 2013 at 6:30 p.m.; in lieu of a Board of Directors meeting.

#### Adjournment

The meeting adjourned at 5:46 p.m.

#### SUMMARY OF METRO VISION ISSUES COMMITTEE MEETING January 15, 2014

MVIC Members Present: Jackie Millet – Lone Tree; Eva Henry – Adams County; Bob Roth – Aurora; Sue Horn – Bennett; Elise Jones – Boulder County; Suzanne Jones – Boulder; Cathy Noon – Centennial; Tim Mauck – Clear Creek County; Jason McEldowney – Commerce City; Chris Nevitt, Rocky Piro – Denver; Jack Hilbert – Douglas County; Marjorie Sloan – Golden; Don Rosier – Jefferson County; Phil Cernanec – Littleton; Val Vigil – Thornton.

Others present: Jeanne Shreve – Adams County; Tim Plass – Boulder; Anthony Graves – Denver; Art Griffith, Joe Fowler – Douglas County; Brad Wiesley – Lafayette; Joe Gierlach – Nederland; Junlin He, Junhao Dai – DU Students; Ted Heyd – Bicycle Colorado; and DRCOG staff.

#### Call to Order

The meeting was called to order at 6:33 p.m.; a quorum was present.

#### **Public Comment**

No public comment was received.

## Move to recommend to the DRCOG Board improvements to the Transportation Improvement Program (TIP) as agreed to during the meeting

This item continues the discussion from the January 8 meeting. Doug Rex provided an overview of the supplemental background materials sent to members prior to the meeting.

Members discussed the materials provided and thanked staff for providing more in-depth information. A timeline for adoption of the 2040 Plans and the 2016-2021 TIP was distributed to members.

Eva Henry asked how affordable housing will be addressed in the Metro Vision update. She noted that suburban neighborhoods were built around the car, and suburbs will not be able to fully qualify as urban centers until we figure out how to get people out of their cars.

Elise Jones asked if the funding equity information could be expressed based on population served. Jack Hilbert noted concern with using population; he thought perhaps it could be based on transit and corridor trips; specifically primary corridors that connect urban centers.

Jennifer Schaufele reminded MVIC members that the deadline for adopting Metro Vision 2040 happens several months after adoption of the new TIP. She noted that many comments will be relevant to discussions about Metro Vision 2040.

Brad Calvert provided information on Urban Centers, and the relationship to transportation funding. He noted that the concept of Urban Centers has been discussed at DRCOG since the late 1970s, and has been a major part of Metro Vision since the beginning. Urban Centers are not designated by DRCOG; rather they are designated by the jurisdiction.

Jack Hilbert noted that the discussion should be focused on the individual Metro Vision-related points for TIP project scoring. A question was asked about the recommendation to eliminate the points for strategic corridors. Steve Cook noted that staff did not feel strongly about eliminating the points but had made the recommendation in the interest of

Metro Vision Issues Committee Summary January 15, 2014 Page 2

simplification He also pointed out that the concept of strategic corridors is not mentioned in any other DRCOG document (e.g. Metro Vision, Regional Transportation Plan) other than the TIP policy. Members expressed interest in retaining the points for projects on strategic corridors. There was some concern noted with project sponsors receiving points for being in an urban center and being on a strategic corridor.

A request was made for information related to projects that were awarded points for being an urban center and on a strategic corridor.

Members discussed points awarded based on transit headways; proximity to urban centers and transit stations; helping communities achieve robust urban centers as opposed to rewarding those who already had them; the nature of the current points for urban centers; and more.

Eva Henry noted she feels that the 1 point for projects within a half-mile of DIA should be eliminated. There was some sentiment for awarding the point for projects within a half-mile of employment centers. It was noted that DIA is federally required to fund its own improvements.

Jack Hilbert **moved**, **seconded** by Chris Nevitt, to remove the 1 point for project location near DIA. The motion **passed** with 2 abstentions.

Sue Horn **moved**, **seconded** by Jack Hilbert to remove the 1 point for signing the Mile High Compact. There was discussion.

Elise Jones noted that many Metro Vision goals are tied to compact development, and feels this is a useful criteria.

Jennifer Schaufele noted the Mile High Compact point differs from the DIA point. The Mile High Compact was a landmark document that the signers agreed to adopt and adhere to the tenets of Metro Vision such as the Urban Growth Boundary (UGB) and working with their neighbors on responsible planning. The intent was to encourage more compact growth and preserve open space. Ninety percent of the metro area's population is served by the entities that signed the compact.

Sue Horn noted that the principles should be upheld but jurisdictions should not be awarded points for signing a piece of paper. Rocky Piro expressed agreement with finding another way to reward adhering to the principles.

Elise Jones noted that perhaps there is another way to encourage regionalism, but is not ready to discard the point for signing the compact. Jason McEldowney agreed.

Jack Hilbert stated that the tenets of the compact are included in comprehensive plans. He feels the Mile High Compact should be updated. Phil Cernanec stated he thinks the Mile High Compact is dated and the points should be taken out.

Metro Vision Issues Committee Summary January 15, 2014 Page 3

Suzanne Jones noted given the history and what it stands for, it's simpler to keep the points for signing the Mile High Compact: the document may be dated but the concepts are not.

Eva Henry suggested awarding the 2 points to community plans that connect to Metro Vision. Jennifer Schaufele noted DRCOG staff doesn't have the ability to go out and check on compliance and it would pit DRCOG staff against jurisdiction staff.

The motion **failed** on a vote of 6 in favor and 8 opposed.

Jackie Millet noted that she would like staff to address the points for UGB; 3 if entirely in the UGB and 1 if the project is partially in. Staff explained that the UGB looks a bit like Swiss cheese; some unincorporated areas create holes where there isn't UGB allocated. There are times when a project may run through areas that do not currently have UGB assigned to them.

Rocky Piro **moved**, **seconded** by Elise Jones, to include rural town centers in the urban center category. The motion **passed** unanimously.

Project location related to Urban Centers, Rapid Transit Stations, and Rural Town Centers Discussion of the evaluation criteria for project location continued. Brad Calvert noted the points for the current TIP resulted from jurisdiction staff feedback on how to prioritize urban centers and rapid transit stations. Brad Calvert explained that staff's proposed criteria change recognizes that it is just as important if a project "directly supports" an urban center as a project located entirely within an urban center. Sue Horn asked if having transit is a prerequisite for receiving the points. Staff noted it is not. The first consideration is whether the project is in an urban center/rural town center or supporting that type of development. Eva Henry noted that the only concern she has is that we are at the mercy of RTD. As a result, the criterion handicaps the suburban and rural areas.

Elise Jones **moved**, **seconded** by Chris Nevitt, to support the staff recommendation on the evaluation criteria related to Urban Centers, Rapid Transit Stations, and Rural Town Centers. There was discussion.

Elise Jones noted that Boulder has put up its own capital to buy additional bus service.

Cathy Noon noted that all suburbs will lose bus service when light rail comes online.

Jackie Millet noted a separate discussion will be had at a later date about points.

Eva Henry noted she thinks the points should be lower. Adams County has 14 percent poverty; they can't afford to buy bus service.

Sue Horn expressed support of the motion because it complies with the principle of "getting the biggest bang for our buck" in reaching regional goals

Metro Vision Issues Committee Summary January 15, 2014 Page 4

Rocky Piro noted if we are awarding points directly tied to where RTD ought to be providing service; perhaps points could be awarded based on commitments jurisdictions are making to create a transit-supportive environment.

Jack Hilbert recommended that the motion be voted down, and have staff bring back something that incorporates the conversation this evening.

Elise Jones noted that staff's proposed criteria revisions can be supported and have a discussion at a future meeting about points.

After discussion, the motion **passed** with 1 opposed.

#### Other Supportive Urban Center Activities

Brad Calvert provided information on the proposed edits to the category. He clarified that this category is to award points to communities that have adopted the tenets of Metro Vision into their zoning or development plans.

Members discussed the topic at length with no resolution. It was agreed to continue the discussion at the February meeting.

#### Other Matters

Pat Cronenberger announced she would be retiring from DRCOG on February 14.

#### Next Meeting

The next meeting is February 5, 2014

#### Adjournment

The meeting adjourned at 9:12 p.m.

#### SUBJECT

This item provides an update on the development of the SCI-funded Denver Regional Equity Atlas 2.0.

#### PROPOSED ACTION/RECOMMENDATIONS

No action requested. This item is for information.

#### **ACTION BY OTHERS**

N/A

#### SUMMARY

The Denver Regional Equity Atlas is an interactive tool providing users with the ability to create maps depicting the region's major origins and destinations in relation to the current and future transit network, and also generates reports on demographic, economic and other data of the region or particular communities. The Atlas emphasizes the importance of access to opportunity for everyone in the region, especially improving connections for the most economically disadvantaged residents.

The Denver Regional Equity Atlas 2.0 was completed by DRCOG staff and builds on the original, static version produced by Mile High Connects in April 2012. The project has met all objectives, came in significantly under the original budget, and the mapping application has received favorable preliminary reviews from prospective users. DRCOG and Mile High Connects hosted a soft launch on December 9, 2013. Public launch will occur in late January 2014/early February 2014.

Meeting Date	Agenda Category	Agenda Item #
February 5, 2014	Action	5

#### SUBJECT

Developing the next TIP (Transportation Improvement Program).

#### PROPOSED ACTION/RECOMMENDATIONS

Recommend for the Board's consideration more simple, straightforward policies and procedures for selecting projects in the upcoming 2016-2021 TIP.

#### **ACTION BY OTHERS**

On November 20, 2013, the DRCOG Board established MVIC as the lead for the new 2016-2021 TIP.

#### SUMMARY

At the January 15 meeting, MVIC voted to recommend the following to the Board:

- Revise the Urban Centers and Rapid Transit Stations criterion to include rural town centers and language clarifications recommended by staff.
- Remove the DIA criterion.
- Retain Mile High Compact criterion.

Also at that meeting, staff was asked to provide information regarding the current 2012-2017 TIP projects illustrated in <a href="Attachment 1">Attachment 1</a>:

- final project evaluation score (excluding studies, the scores for selected projects ranged from 40 to 77 points).
- a list of projects which received points for serving a designated urban center and for serving a strategic corridor.

#### Items for today's discussion and action:

#### 1. Metro Vision project scoring criteria

As previously discussed, 26 percent of the total points in the current TIP may be awarded based on how the project and the project sponsor attend to the tenets of Metro Vision. These criteria are used for all project applications. Currently adopted TIP evaluation criteria as well as staff-recommended changes related to Metro Vision project scoring are in <a href="Attachment 2">Attachment 2</a>.

Metro Vision items still requiring MVIC action:

Project Location-related Metro Vision criteria	Staff recommendations
<ul> <li>Features of the Urban Center(s) served</li> </ul>	Retain, with clarifications.
Urban Growth Boundary	Retain, but with simplified scoring instructions.
Strategic Corridors	Remove, because these corridor designations are obsolete.

Sponsor/Jurisdiction Metro Vision criteria	Staff recommendations
<ul> <li>Did jurisdiction adopt Metro Vision community design policies?</li> </ul>	Retain.
<ul> <li>Did jurisdiction implement alternative travel mode plans?</li> </ul>	Retain, but with simplified scoring instructions.
<ul> <li>How is the jurisdiction working to reduce street sanding impacts related to particulate matter (PM-10) pollution?</li> </ul>	Retain.

#### General Metro Vision points and criteria

- Is roughly one-quarter of the total points (100) a reasonable share to reflect Metro Vision tenets?
- Are there other types of criteria that should be included/excluded?

#### 2. Minimum funding request level for projects

Staff recommendation: Establish \$100,000 as the new minimum request for federal funds to give small projects better opportunity to compete for TIP dollars. To minimize the administrative burden of managing several small projects, the total number of projects funded between \$100,000 and \$300,000 will be capped at 10 per TIP cycle. DRCOG staff will thoroughly explain the implications of federalizing projects during each call for projects and will assist project sponsors and CDOT as appropriate.

Rationale: Staff's recommendation creates a blanket minimum when requesting federal funds. This eliminates unnecessarily detailed minimum levels in the current TIP (below) and provides new opportunity to fund small but important projects.

#### Currently-adopted minimum request levels

- Non-Construction Projects
  - o Studies: \$75,000
  - Other non-Construction: \$200,000
- Construction Projects
  - Submitted by Very Small Communities: \$200,000
     Submitted by Other Eligible Sponsors: \$300,000

#### Next Steps

We anticipate CDOT will know how much federal money DRCOG will have available in each federal category (highway, air quality, etc.) in late February. Therefore, MVIC will likely be discussing how much funding to put toward DRCOG's various types of projects (roadway capacity, bike and pedestrian facilities, etc.) at its March meeting.

#### **APPENDIX F**

## PROJECT\_LOCATION--RELATED METRO VISION IMPLEMENTATION AND STRATEGIC CORRIDOR FOCUS

\*See specific definitions below for some criteria\*

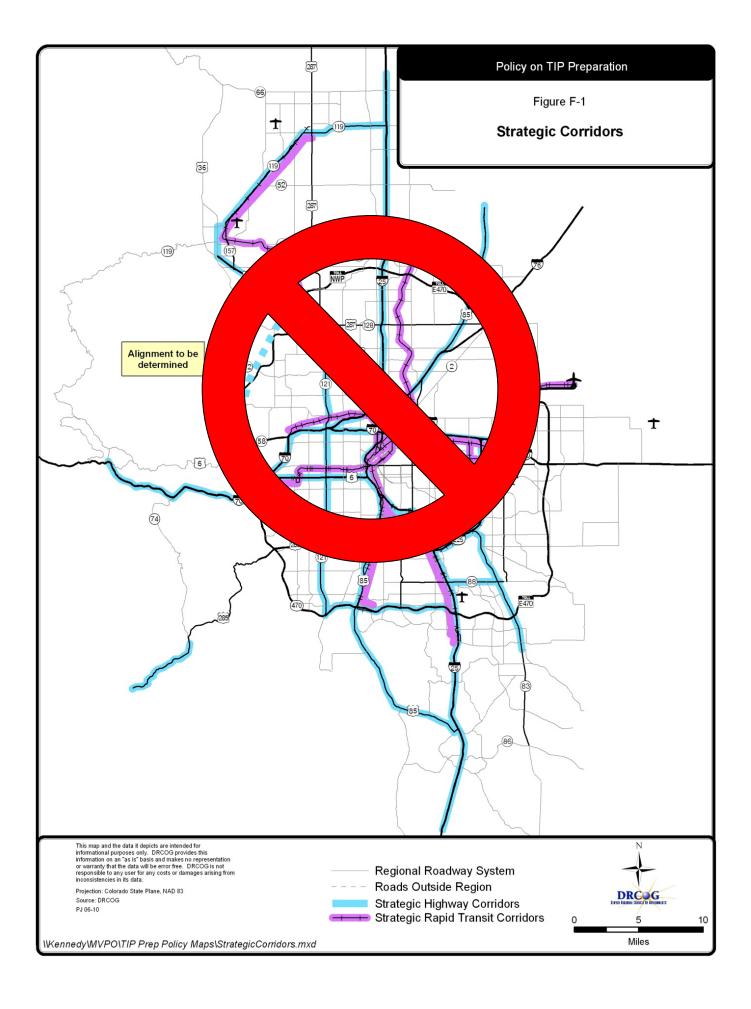

Evaluation Criteria	Points Each	Scoring Instructions
Project location related to Urban Centers, and Rapid Transit Stations, and Rural Town Centers	Up to 6	(Score points for only one) Project is entirely within, or directly supports, an urban center identified in the adopted Metro Vision 2035 (current urban center locations can be found here: http://www.drcog.org/documents/UrbanCenters.pdf, or is within proximity of and helps support the functioning of the urban center by directly or indirectly serving it (definitions below):  • 6 points if thefor an urban center that is within ½ mile of includes a rapid transit station shown on the adopted Metro Vision 2035 RTP  • 5 points if the for an urban center is currently served by transit with 15 minute combined service headways or less • 4 points if the for an urban center is currently served by transit with 30 minute combined service headways or less • 2 points for:  • All other urban centers  • A rapid transit station (that is not an urban center)  • Designated rural town centers  • O points if project is not in or within proximity of an urban center or rapid transit station
Features of the Urban Centers the project is within or within preximityOther Supportive Urban Center Implementation Activities	Up to 4	<ul> <li>(Score for all that are applicable)</li> <li>1 point for an urban center where the community has implemented zoning or development plans that allow a mix of uses with minimum gross densities that promote population and/or employment densities higher than the minimum required for urban center designation (as specified in the Metro Vision 2035 Growth and Development Supplement)</li> <li>1 point for an urban center where the community has adopted parking management strategies that minimize the potential negative effects of parking on urban center development and multimodal access increase the competitiveness of non-SOV travel modes (e.g., parking maximums, elimination of parking minimums, shared parking and pricing strategies)</li> <li>1 point for an urban center where the community has committed to preserve or develop mixed-income housing (see definitions below).</li> </ul>

Evaluation Criteria	Points Each	Scoring Instructions
Project location related to Urban Growth Boundary/Area (UGB/A)	Up to 3	<ul> <li>1 point for <u>if the proposed project is identified in an adopted Urban Center or Station Area Master Plan.</u> an urban center where the relevant capital improvement program, operating budget or equivalent has allocated funding over the next four years to the construction or implementation of supportive infrastructure, facilities or programs located in the urban center (see definitions below). This funding allocation must be in addition to the TIP funding request and associated local match, and be equivalent to at least 20% of the TIP funding request</li> <li>3 points if the project is <u>at least 90% entirely</u> contained within the established UGB of a UGB community or the "committed area" of a UGA community</li> <li>1 point if the project is <u>at least 40% contained partially</u> within the established UGB of a UGB community or the</li> </ul>
Project location related to Denver International Airport (DIA)	1	"committed area" of a UGA community  (Score point if applicable)  1 point if project is in or within one-half mile of DIA boundary and provides convenient access to DIA
Project location related to Strategic Corridors	<del>Up to 4</del>	(Score points if applicable, for only 1 of the 2) Project is entirely on a strategic corridor shown on Figure F-1 (including relevant rapid transit lines), or is within proximity of and helps support the functioning of the strategic corridor by directly or indirectly serving it (definitions below):  - 4 points if two or more strategic corridors - 2 points if one strategic corridor
Total Points Possible		

#### \*Definitions:

- Urban center = as identified in the Metro Vision 2035 Plan
- Rapid transit station = current or future stations as identified in the fiscally constrained Metro Vision 2035 RTP
- Rural town center = as identified in the Metro Vision 2035 Plan
- Commitment to preserve mixed-income housing = the community has inventoried the number of existing affordable housing units located within the urban center and has committed to preserving or replacing these units (1 for 1)
- Commitment to develop mixed-income housing = the community has committed that some portion of the new stock created within the urban center over the next six years will be affordable
- Affordable housing = rental units affordable to households earning 0-60% of the area median income (AMI) and for-sale units affordable to households earning 0-80% of AMI
- Qualifying supportive infrastructure, facilities and or programs located within urban centers include, but are not limited to:
  - o Public buildings,
  - Structured parking, parking controls or management systems,
  - o Parks, playgrounds, plazas, squares and other publicly accessible open spaces,
  - Sidewalks, medians, enhanced pedestrian crossings and refuges, raised crosswalks,
  - Streetscaping: enhanced tread surface materials, public furniture, landscaping, street trees, planters, light posts, thematic signage, monuments and public art,
  - Stormwater drainage, detention and infiltration projects

- Wastewater sewer lines
- Utility upgrades
- Directly serving = physically touching
- Indirectly serving = serving via an existing or included-in-the-project linkage
- Proximity (measured as crow flies)
  - For bus service projects: must directly serve <u>urban center</u> or fixed guideway <u>transit station</u> or use HOV/BRT guideway in <u>strategic corridor</u>.
  - For all project types except new bus projects: project area within 1/2 mile of <u>urban</u> <u>center</u> outer boundary or fixed guideway <u>transit station</u> platform location or fixed guideway transit station platform location or the centroid of a freeway interchange or major intersection (if not freeway) in <u>strategic corridor</u>.

#### **APPENDIX G**

#### SPONSOR-RELATED METRO VISION IMPLEMENTATION CRITERIA

(or the project location's jurisdiction)

Evaluation Criteria	Points	Scoring Instructions
Adopt Metro Vision community design policies, including policies that promote senior-friendly developmentLocal response to changing demographics	Each 1	Demonstrate that Metro Vision community design jurisdiction's plans, programs, and policies to support healthy and successful aging. Please see the Boomer Bond Assessment Tool and Toolkit for example implementation strategies.policies, including policies that promote senior friendly development, have been incorporated into local plans and development regulations or are being implemented.
Implement alternative travel mode plans	1	Provide jurisdiction's Show adopted plans for either bicycle, pedestrian, transportation demand management (TDM), or transit forms of travel. Demonstrate implementation showing an example project in the jurisdiction's currently adopted (as of July 31, 2014) are being implemented by demonstrating that at least \$3/resident*/year (average) has been allocated to the construction or implementation of facilities/programs in the plan(s) by the agency's capital improvement program or operating budget, or equivalent, during the past five years. (* for counties, residents are those in the unincorporated area).
Signed the Mile High Compact	2	Provide the date when the local jurisdiction signed the Mile High Compact.
'	nly one PM	oriterion, depending if it was asked to make a commitment or not
PM <sub>10</sub> conformity commitment (for communities that were asked to make a conformity commitment)  OR	Up to 4	If the sponsor or project's local jurisdiction has made a conformity commitment (submitted to DRCOG before July 310, 20140) for the horizon year in the RTP (2035) that exceeds:  • 30 percent reduction, award 1 point.  • 45 percent reduction, award 2 points.  • 55 percent reduction, award 3 points.  If the sponsor or project's local jurisdiction is meeting its 2015 conformity commitment in current practice, award 1 additional point to the PM <sub>10</sub> points scored above. The survey of past performance conducted annually in June by the RAQC will be compared to the conformity commitments assembled for the 2035 RTP update conformity.
Current practice (for communities that	Up to 4	Based on the survey of past performance conducted annual in June by the RAQC, if the sponsor or project's local jurisdiction has
were <b>not</b> asked to make a PM <sub>10</sub> conformity commitment)		<ul> <li>a current practice that exceeds:</li> <li>30 percent reduction, award 1 point.</li> <li>45 percent reduction, award 2 points.</li> <li>55 percent reduction, award 4 points.</li> </ul>
