| 20. Dan Jackson | RTD |
| 21. John Voboril | Englewood |

Meeting Materials for Reference:

AUG 2013 Agenda.docx
AUG 2013 Presentation.pdf

Objective: Reviewing the specifications outlined in the DRAPP 2014 RFPs, highlighting differences from past years, and presenting schedule of upcoming events.

Questions?

If you have any questions or comments about DRAPP, please contact DRCOG GIS Manager Ashley Summers at asummers@drcog.org or 303-480-6746.

Discussion Points:

- RTD mentioned that changing tiling schemes could be burdensome to their staff since they use AutoCAD. DRCOG offered to provide the newly proposed tiling scheme in the next few weeks with attribution crosswalked to previous versions so that staff could begin evaluating.
- Attendees discussed their preferences for 3in tile size. The options were for fewer, larger tiles or lots of smaller tiles. The preference appeared to be for fewer, larger tiles. That means that the 3in imagery will be provided in the same tiling scheme as the 6in and 1ft imagery.
- Commerce City brought up the radiometric shift problem with band 4 in the 2010 3-inch data. DRCOG will make sure this is addressed in the DAT criteria.
- Jefferson County requested that an Option for Subsequent Partnerships (similar to what is mentioned in the imagery RFP) be added to the LiDAR RFP to enable jurisdictions in the CWCB LiDAR Acquisition Boundary to get that data post processed by the DRAPP LiDAR vendor. DRCOG will add this language to the LiDAR RFP.
